

Proposed CABY Programmatic Structure and Issues

Those that are highlighted were identified as “CABY Issues” in 2007/2008.

<i>Program Areas</i>	Water Supply	Water Quality	Watershed Restoration and Preservation	Climate Change	Human-Landscape Interactions
<i>Program Initiatives (project type)</i>	Reliability	Legacy Mining Contaminants	Wetlands/Mountain Meadows	Water Supply, Infrastructure, & Operations	Working Landscapes
	Demand Management	Sedimentation	Fisheries and Aquatic Biota	Natural Systems	Native People and DACs
	Water Recycling	Contamination	Catastrophic Fire	Socio-economic	Hydropower
	Conjunctive Use	Temperature	Instream Flows	Water Supply, Infrastructure, & Operations	Working Landscapes
	Conveyance		Habitat Alteration		
	Flooding				
	Ground Water Management				
	Diversions				
	Water Rights				
	Agriculture				
	Operations Efficiencies				

Projects developed for each program will seek to include relevant Initiative Elements.

Planning, research, and assessment
 Data Management
 Resource Mapping
 Land Use Coordination - Mandatory Plans
 Education, outreach, capacity building

 Beneficial Cost/Benefit Ratios
 Monitoring
 Disadvantaged Communities Participation
 Consideration of state-wide significance
 Collaboration with Adjacent IRWMPs
 Environmental Compliance/Permitting
